

Interviewing Mothers to Determine Causes of Low Milk Production

YOUR ROAD MAP

INSUFFICIENT MILK
~Differential Dx~

SECONDARY FAILURE
Full ability to produce milk,
but external interference
w/establishment

DELAYED
Full ability to produce milk,
but process of Lact II
temporarily impaired

PRIMARY FAILURE
One or more chronic, extrinsic
or intrinsic factors causing
lowered ability to produce milk

Infant

Maternal

Physical:
Surgeries, trauma,
anatomical defects

Physiologic:
More hormonal

**Management
vs
Accidental inhibitors**

Environmental?

**Poor mammary
development; milk
synthesis impaired**
