SCREENING FOR MILK SUPPLY PROBLEMS

MOTHER: Secondary
- Poor latch
- Poor breast/mouth fit
- Firm, inelastic breast tissue
- Infrequent feeds (<8x/24 hrs)
- Restricted feeding times
- Schedule feeding
- Infrequent pumping sessions
- Reliance on poor quality breast pump
- Medications
- Hormonal birth control started:
  - Pill
  - Patch
  - IUD
  - Injection
- Herbs
- Poor nutrition or <1500 kcals/day
- Breast infection

MOTHER: Delayed /Suppressed lactation:
- Milk in >72 hrs
- Premature labor & milk in before birth
- Corticosteroids for premature labor
- Swelling after birth (edema)
- Hypertension
- Difficult birth/stress/urgent c-section
- Severe PP bleeding/ hypotensive / anemia
- Placental problems during preg/delivery
- Retained placental tissue
- Placenta accreta, increta, percreta
- Gestational ovarian theca-lutein cyst
- SSRIs in late pregnancy or early pp
- Insulin tx of GDM
- Advanced Maternal Age

MOTHER: Primary
- Breast augmentation
- Breast reduction
- Breast biopsy/surgery
- Breast radiation
- Blunt trauma to chest or burn wounds
- Spinal cord injury//accidents
- Obstructed ducts or nipple pores
- Previous severe mastitis or abscess
- History of Infertility
- Obesity or Gastric bypass surgery
- Thyroid dysfunction (hypo/hyper, or PP)
- GDM/ T1 / T2 Diabetes/ Metabolic Syndr
- Hyperandrogenism// clinical or lab
- PCOS
- Hx of hyperPRL: tx?
- High PRL, low milk, ok breasts: macro?
- Hx autoimmune condition
- Other

LACTATION CURVE RISKS OR RED FLAGS
- Early return of menses
- Chronic breast inflammation
- Low baseline prolactin
- Overweight
- Insulin resistance
- Smoker
- Infant suck/ bfg struggles/ early term
- New pregnancy
- Family hx alcoholism
- Chronic incomplete breast drainage

MOTHER: IGT risk factors
- Breast type (Huggins): 1 2 3 4
- Unusual breast shape
- Distance between breasts > 1.5”
- Significant asymmetry of breasts
- Prenatal breast growth? 0 1 2
- Postpartum breast growth? 0 1 2
- Stretch marks with little breast growth
- Scant veining
- Bulbous areola
- Sparse palpable glandular tissue
- Exposure to disruptive chemicals
- Androgynous body type
- Late breast development
- BCPs before breasts fully developed
- Obese/insulin resistant prior to puberty

MOTHER: Milk Ejection
- History of abuse
- Recent traumatic event or birth
- Post-traumatic stress disorder or bfg pain
- Sick premature baby
- Alcohol
- Cigarettes
- Thyroid problems, esp hyper (CX-43 prob)
- Diabetes? (CX-43 prob)

BABY:
- Cardiac or respiratory problems
- Suck/swallow/breathe difficulties
- Stridor (squeaking)
- High or low muscle tone
- Torticollis (head pulls to one side)
- Small or Large for gestational age baby
- Very receding chin
- Hard/soft/submucousal cleft palate
- Bubble palate
- Restrictive lingual frenulum/tongue-tie
- Lip-tie
- Clicking, Tongue retracting or thrusting
- Weak suction or slips off a lot
